Disruptions are the new norm

Geopolitical tensions

Protectionism, sanctions, and policy changes

Supply chain bottlenecks

Transportation and availability shortages and delays

Macroeconomic swings

Inflation, recession, and rising cost of capital

Climate change

Sustainability, physical damage, and ESG requirements

Technology evolution

AI, supercomputing, virtual reality, and cybersecurity

Evolving customer demands

Shifting loyalty, omni-experience, and shifting needs

The reality of AI amidst global disruptions

AI is everywhere. Results aren't.

Three gaps are keeping AI stuck in pilot.

Lack of
business &
process context

Lack of
data connection
& integration

Lack of
governance &
reliability

The providers promising to fix this don't have the foundation to do so.

Most AI providers are building from the outside in.

Layering intelligence on top of systems they don't own, data they didn't generate, processes they've never run.

42%

Report data access & quality
issues as leading barrier

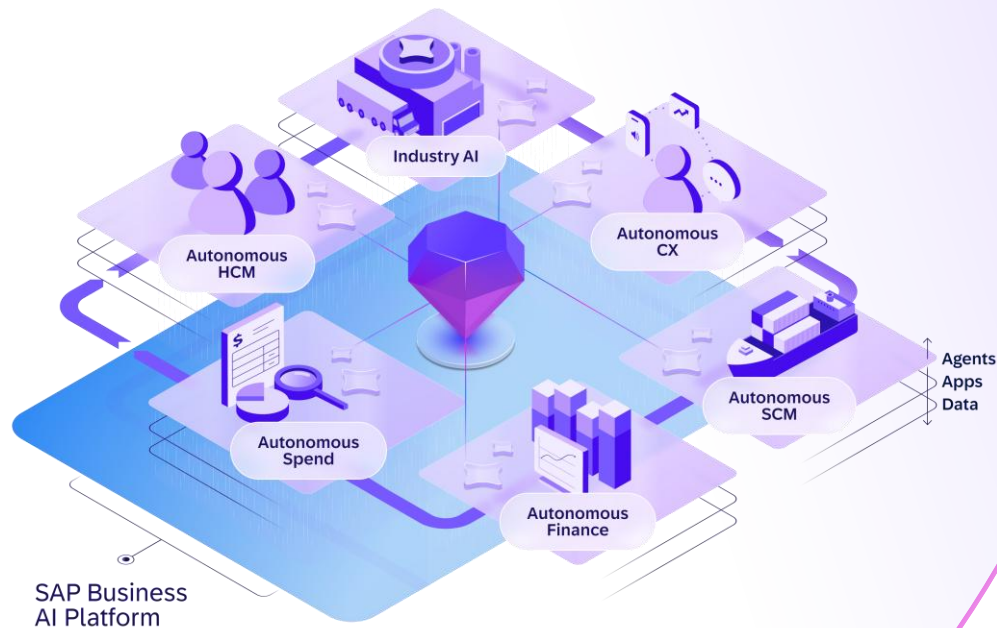

ANTHROPIC

74%

of orgs stuck in pilot mode with
no path to scale

BCG

The Autonomous Enterprise **runs differently**

Your people can do their best work.

Agents handle routine transactions end to end, so people can focus on the decisions that move the business.

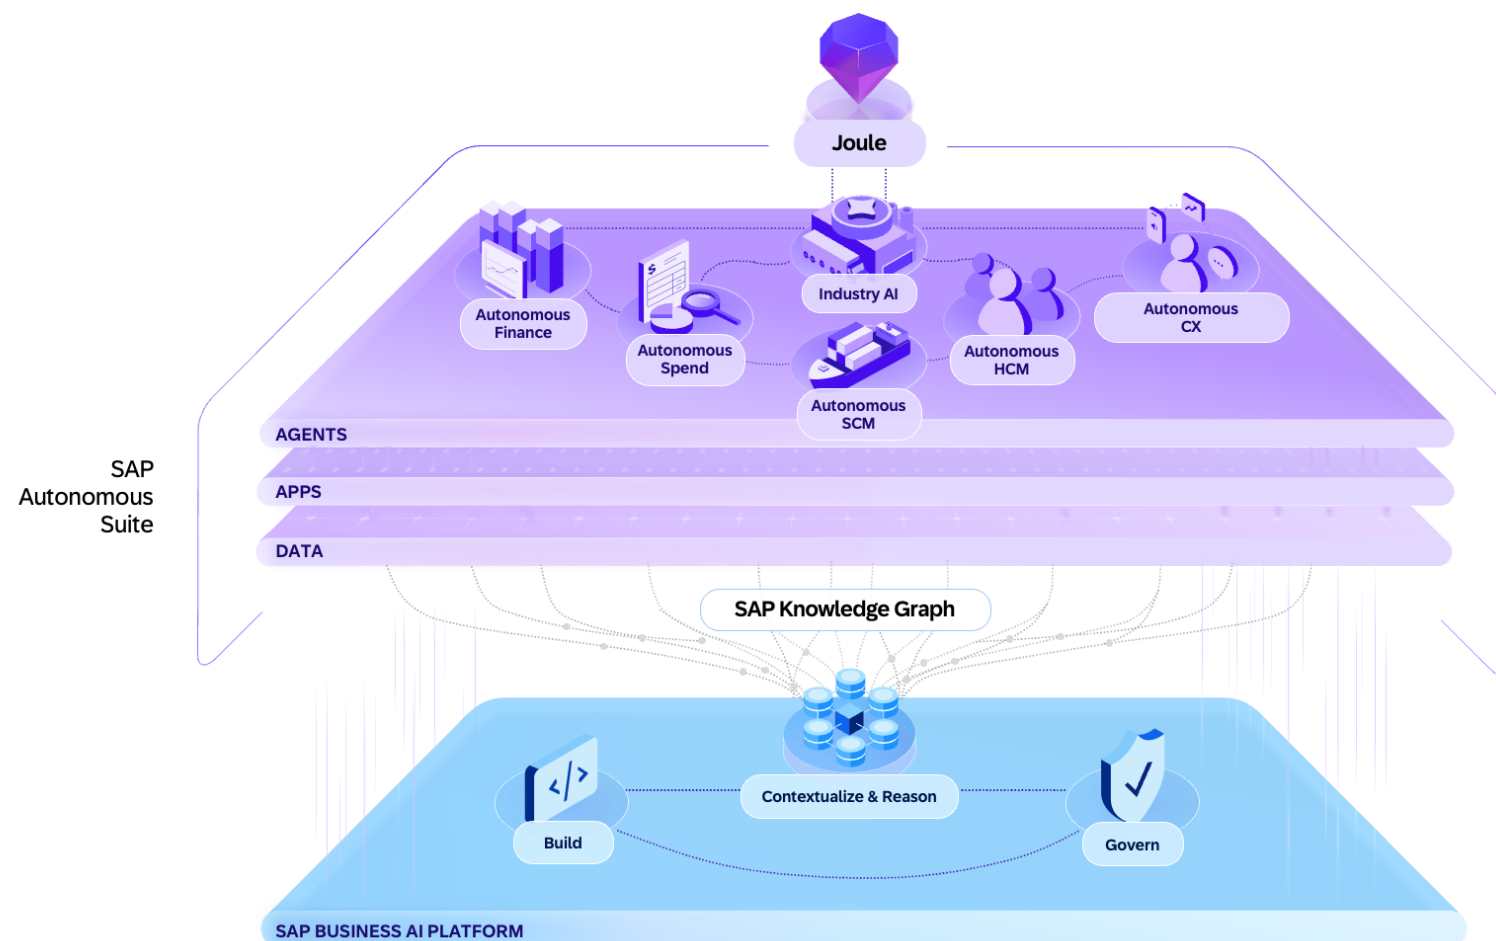

Your business responds before teams convene.

When conditions change, the business acts as one. Agents coordinate across the business in real time. No lag between signal and action.

You move fast because you can trust the system.

Every AI action is governed, auditable, and traceable. Not added later. Built in from the start. Speed and control aren't a tradeoff.

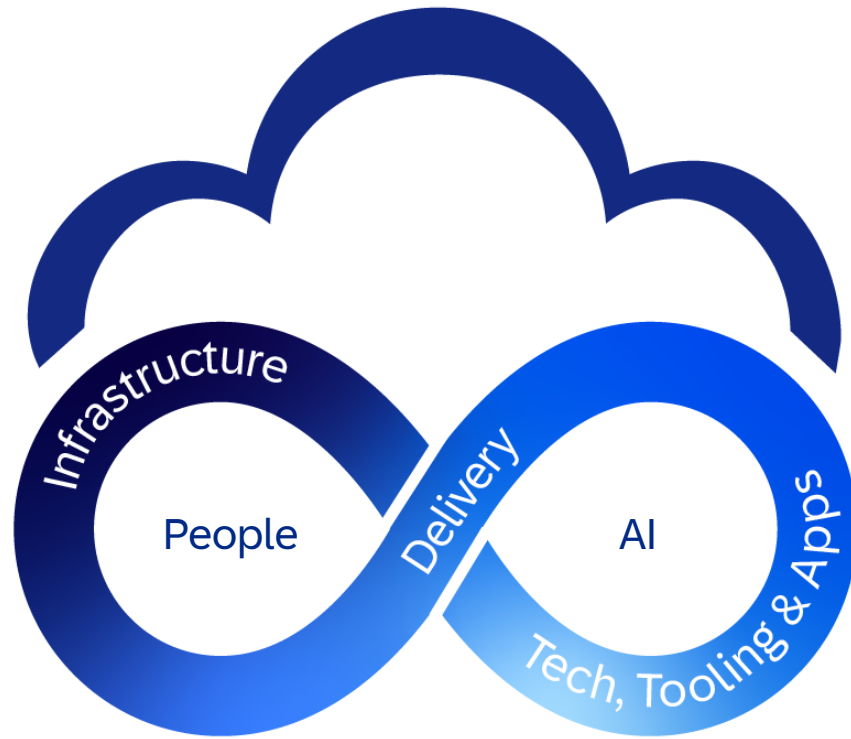

Five key elements of the Autonomous Enterprise

- 1 **Joule** as the new engagement layer, bringing together data, workflows, and agents across SAP systems and beyond
- 2 **SAP Autonomous Suite** to reinvent how enterprises run, based on AI assistants and agents executing work E2E
- 3 **Industry AI** embeds the process knowledge, compliance rules, and data models specific to your industry
- 4 **SAP Business AI platform** delivering business context, unified data, models, and enterprise-grade governance
- 5 **Accelerate the evolution to an Autonomous Enterprise** with agent-led transformation, delivered through RISE and GROW

GCO | Global Cloud Operations

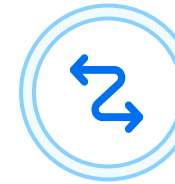

Delivering maximum impact in all cloud deployment models

Public Cloud

Private Cloud

Sovereign Cloud

End-to-end cloud experience for customers at every stage of their cloud journey

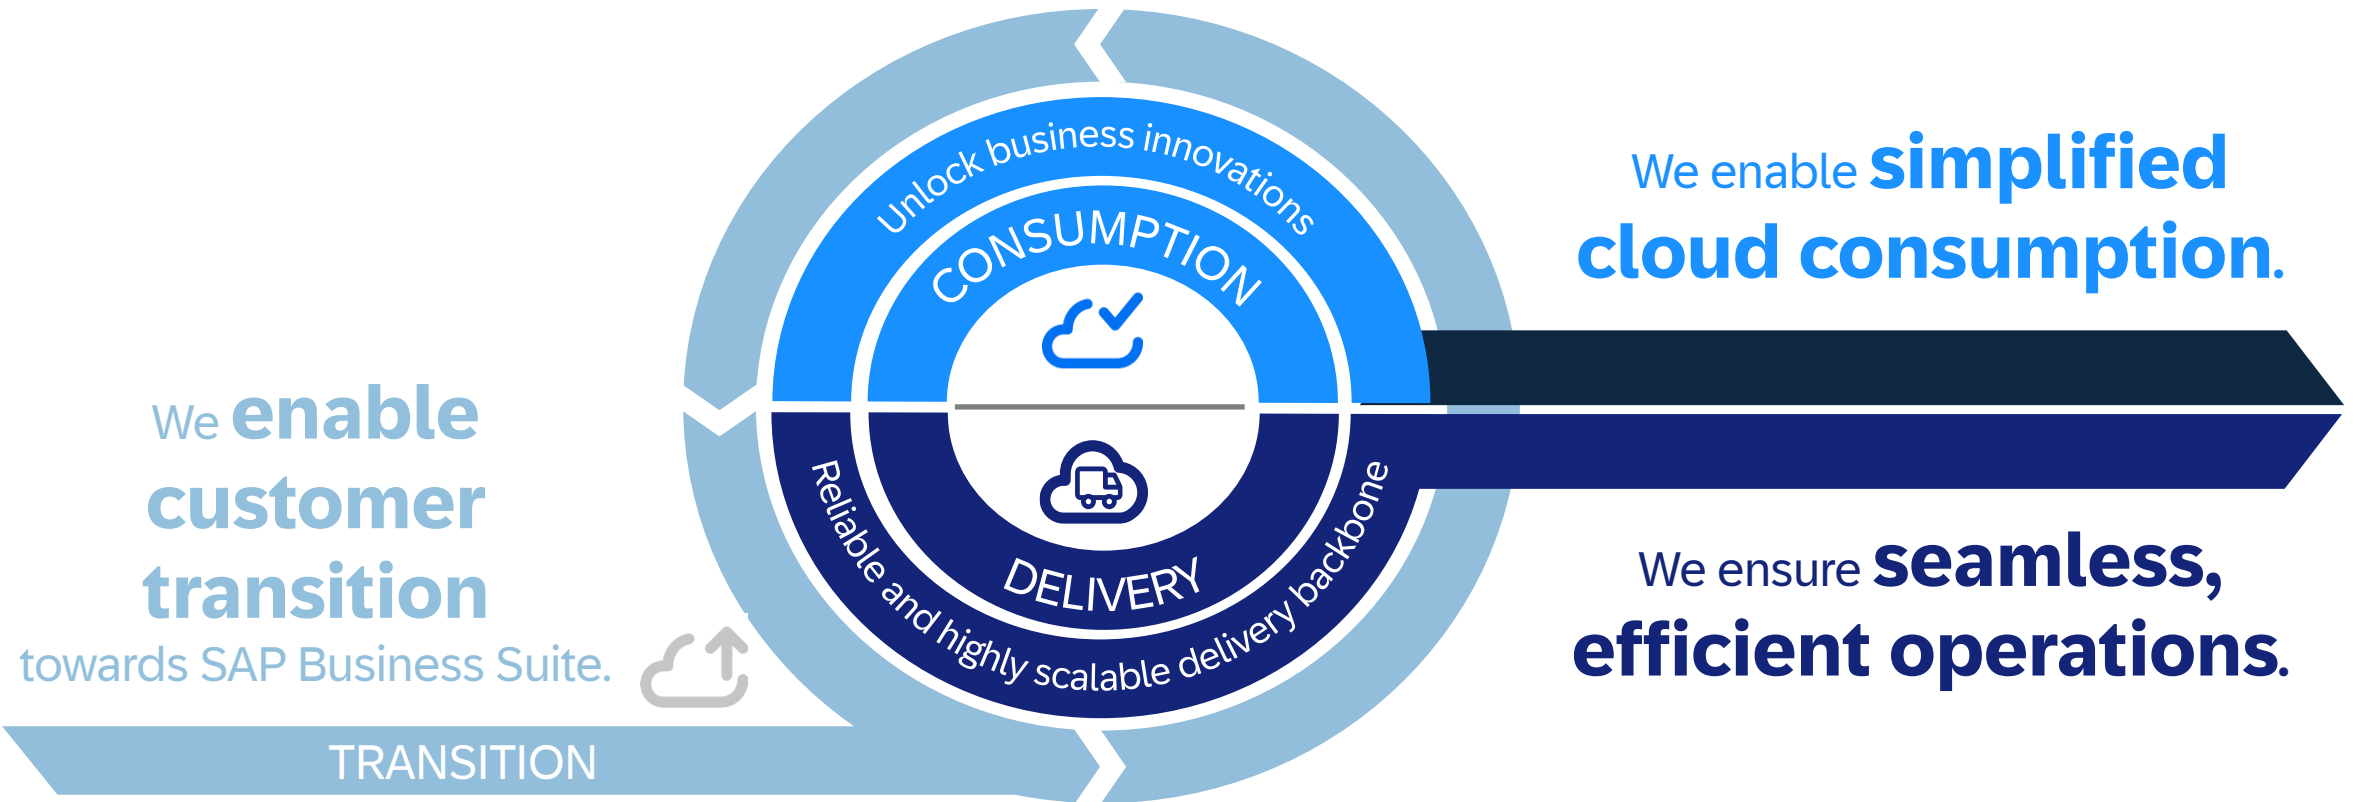

Drive adoption and consumption across our portfolio

Seamless transition to the Autonomous Enterprise to leverage its full effects

Cloud Lifecycle Engineering: We make SAP solutions run best

Focus Topics for CLM day

Unlock Business Innovation to accelerate adoption

Maintenance Planner enables software change planning of SAP products in customer private-cloud and on-premise system landscape.

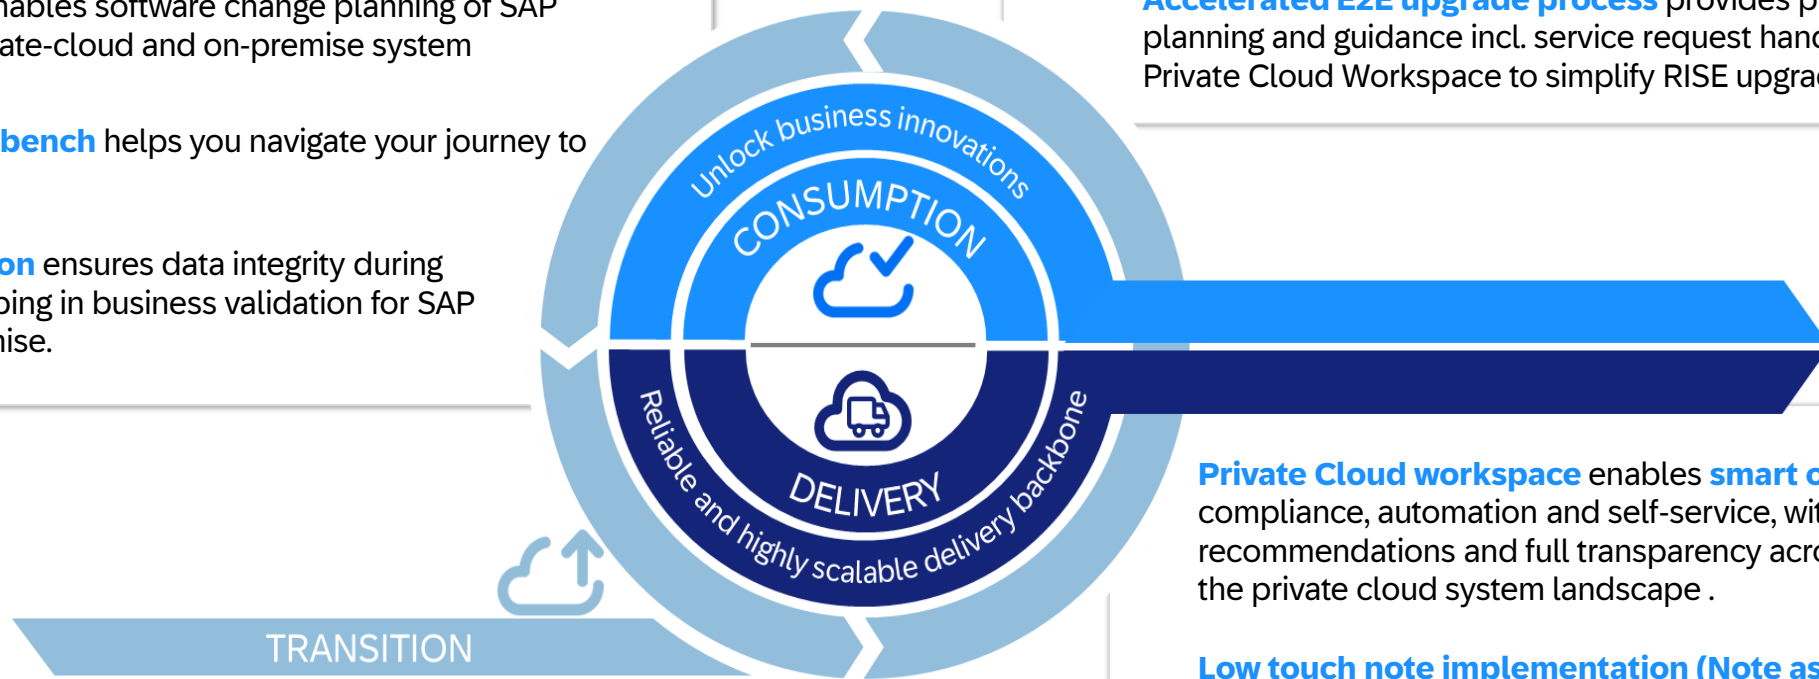

System Transition Workbench helps you navigate your journey to RISE with SAP

Data Transition Validation ensures data integrity during system transitions, by helping in business validation for SAP S/4HANA RISE & On-premise.

Intelligent Scenario Lifecycle Management enables seamless AI integration through a standardized, ABAP-native framework

Cloud Integration Automation Service provides guided workflow simplifying SAP cloud integration setup,

Accelerated E2E upgrade process provides provides planning and guidance incl. service request handling in Private Cloud Workspace to simplify RISE upgrades

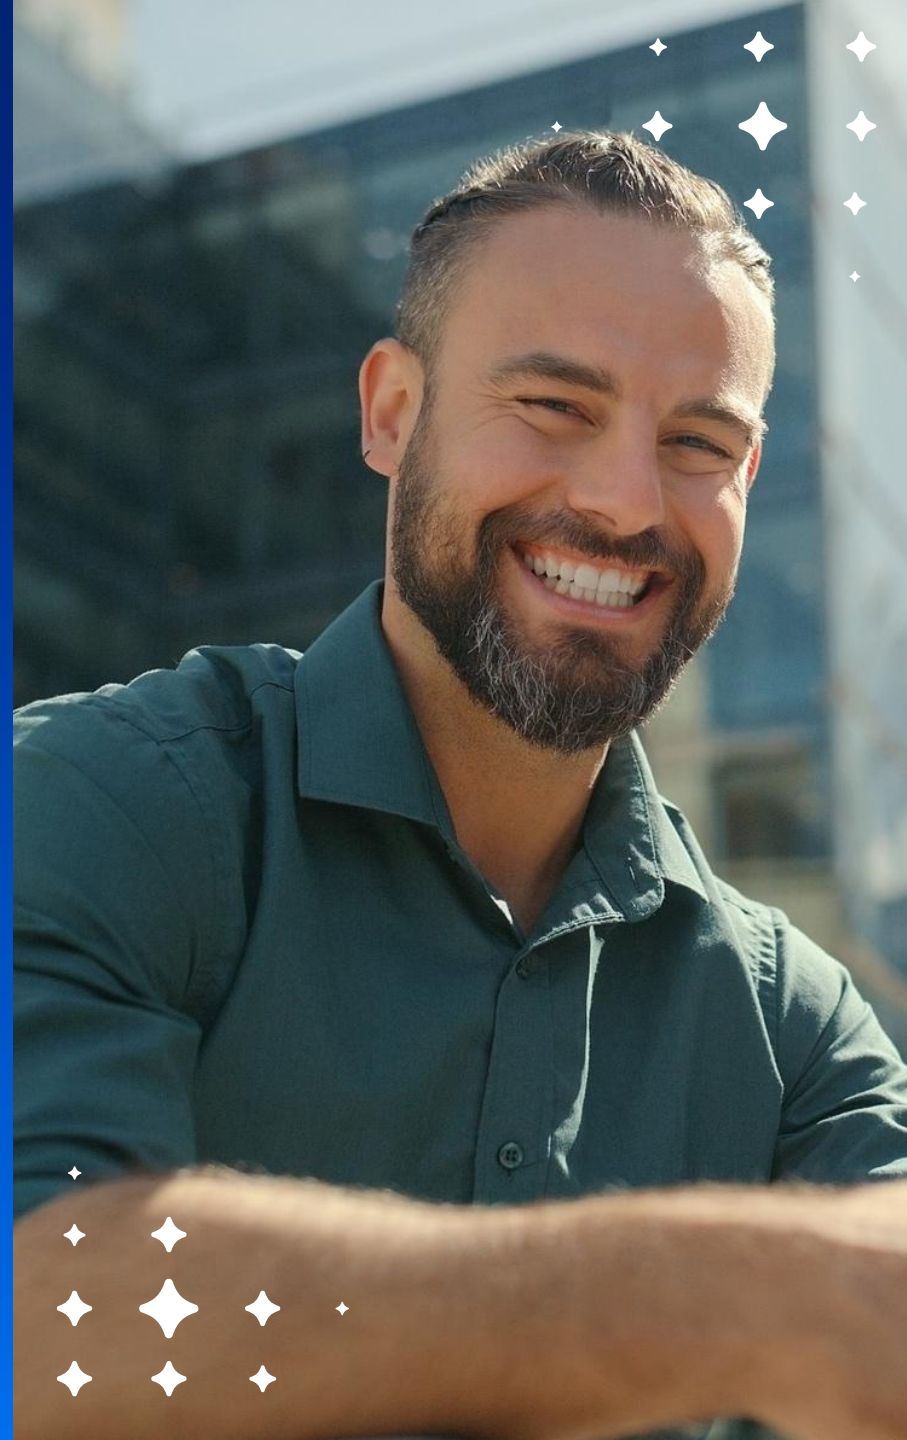

Private Cloud workspace enables **smart operations** incl. compliance, automation and self-service, with actionable recommendations and full transparency across the private cloud system landscape .

Low touch note implementation (Note assistant) enables efficient correction delivery and implementation of notes

Content Management on SAP BTP enables content management operations across SAP BTP.

Autonomous Enterprise: Infusing SAP Business AI

Intelligent Scenario Lifecycle Management (ISLM)

SAP Business AI in every ABAP Application

Native

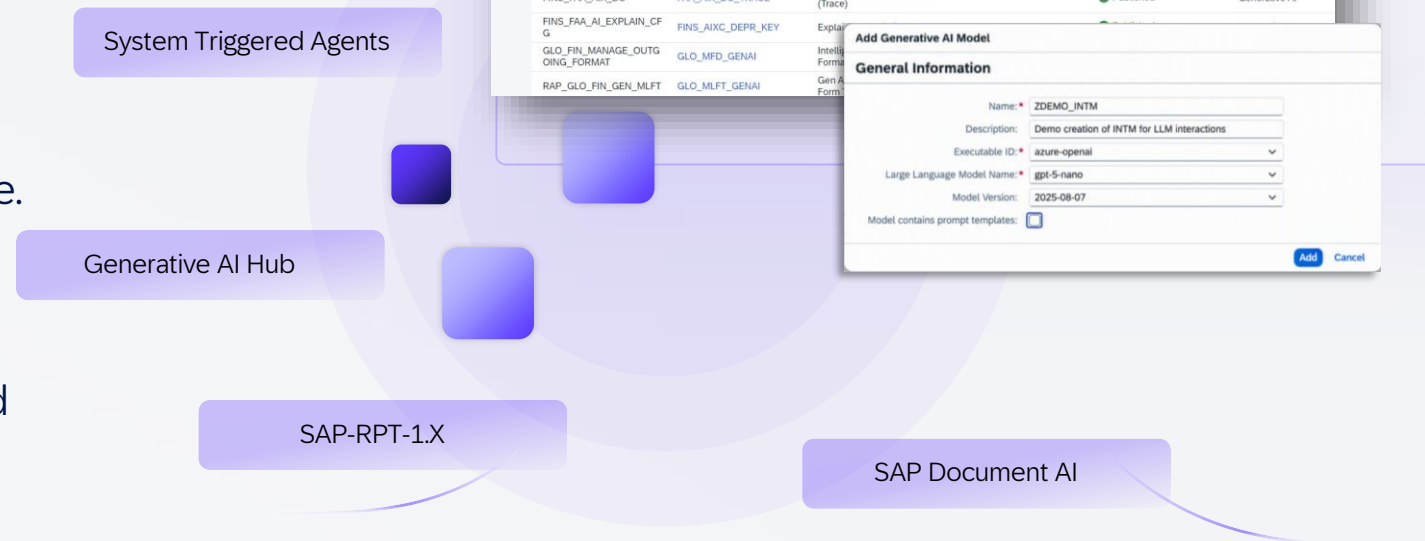

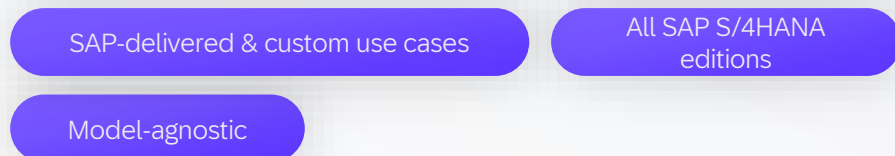

Consume AI directly, within SAP S/4HANA through ISLM, available across all editions, without additional middleware, infrastructure, or licensing.

Proven

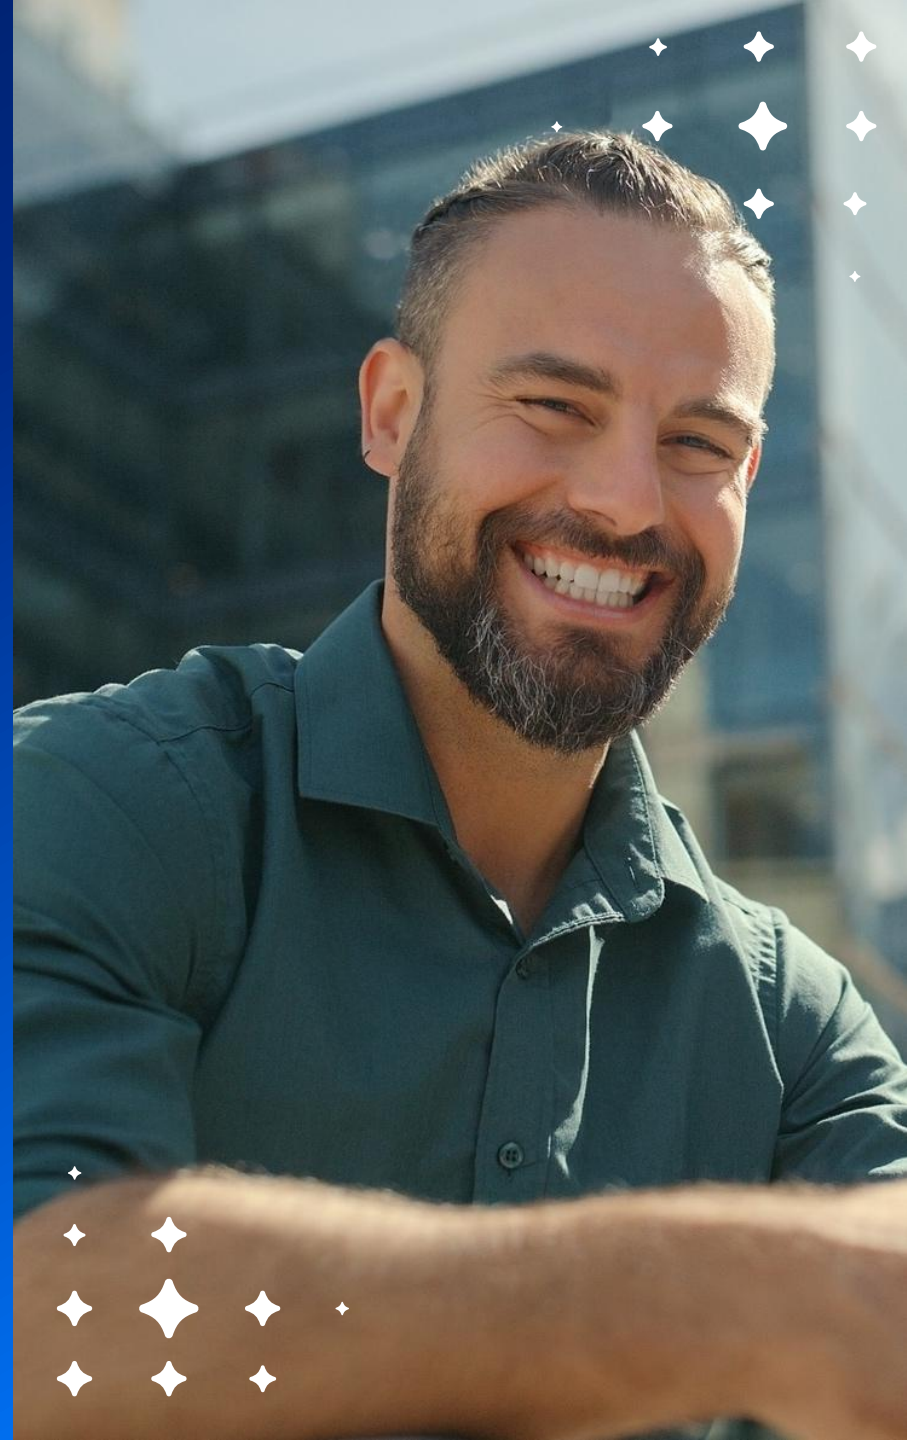

Built on the same framework SAP uses for its own embedded AI scenarios, production-hardened, with lifecycle management and governance already in place.

Custom AI

Build your own custom AI solutions on the same foundation, with end-to-end lifecycle management and governance from day one.

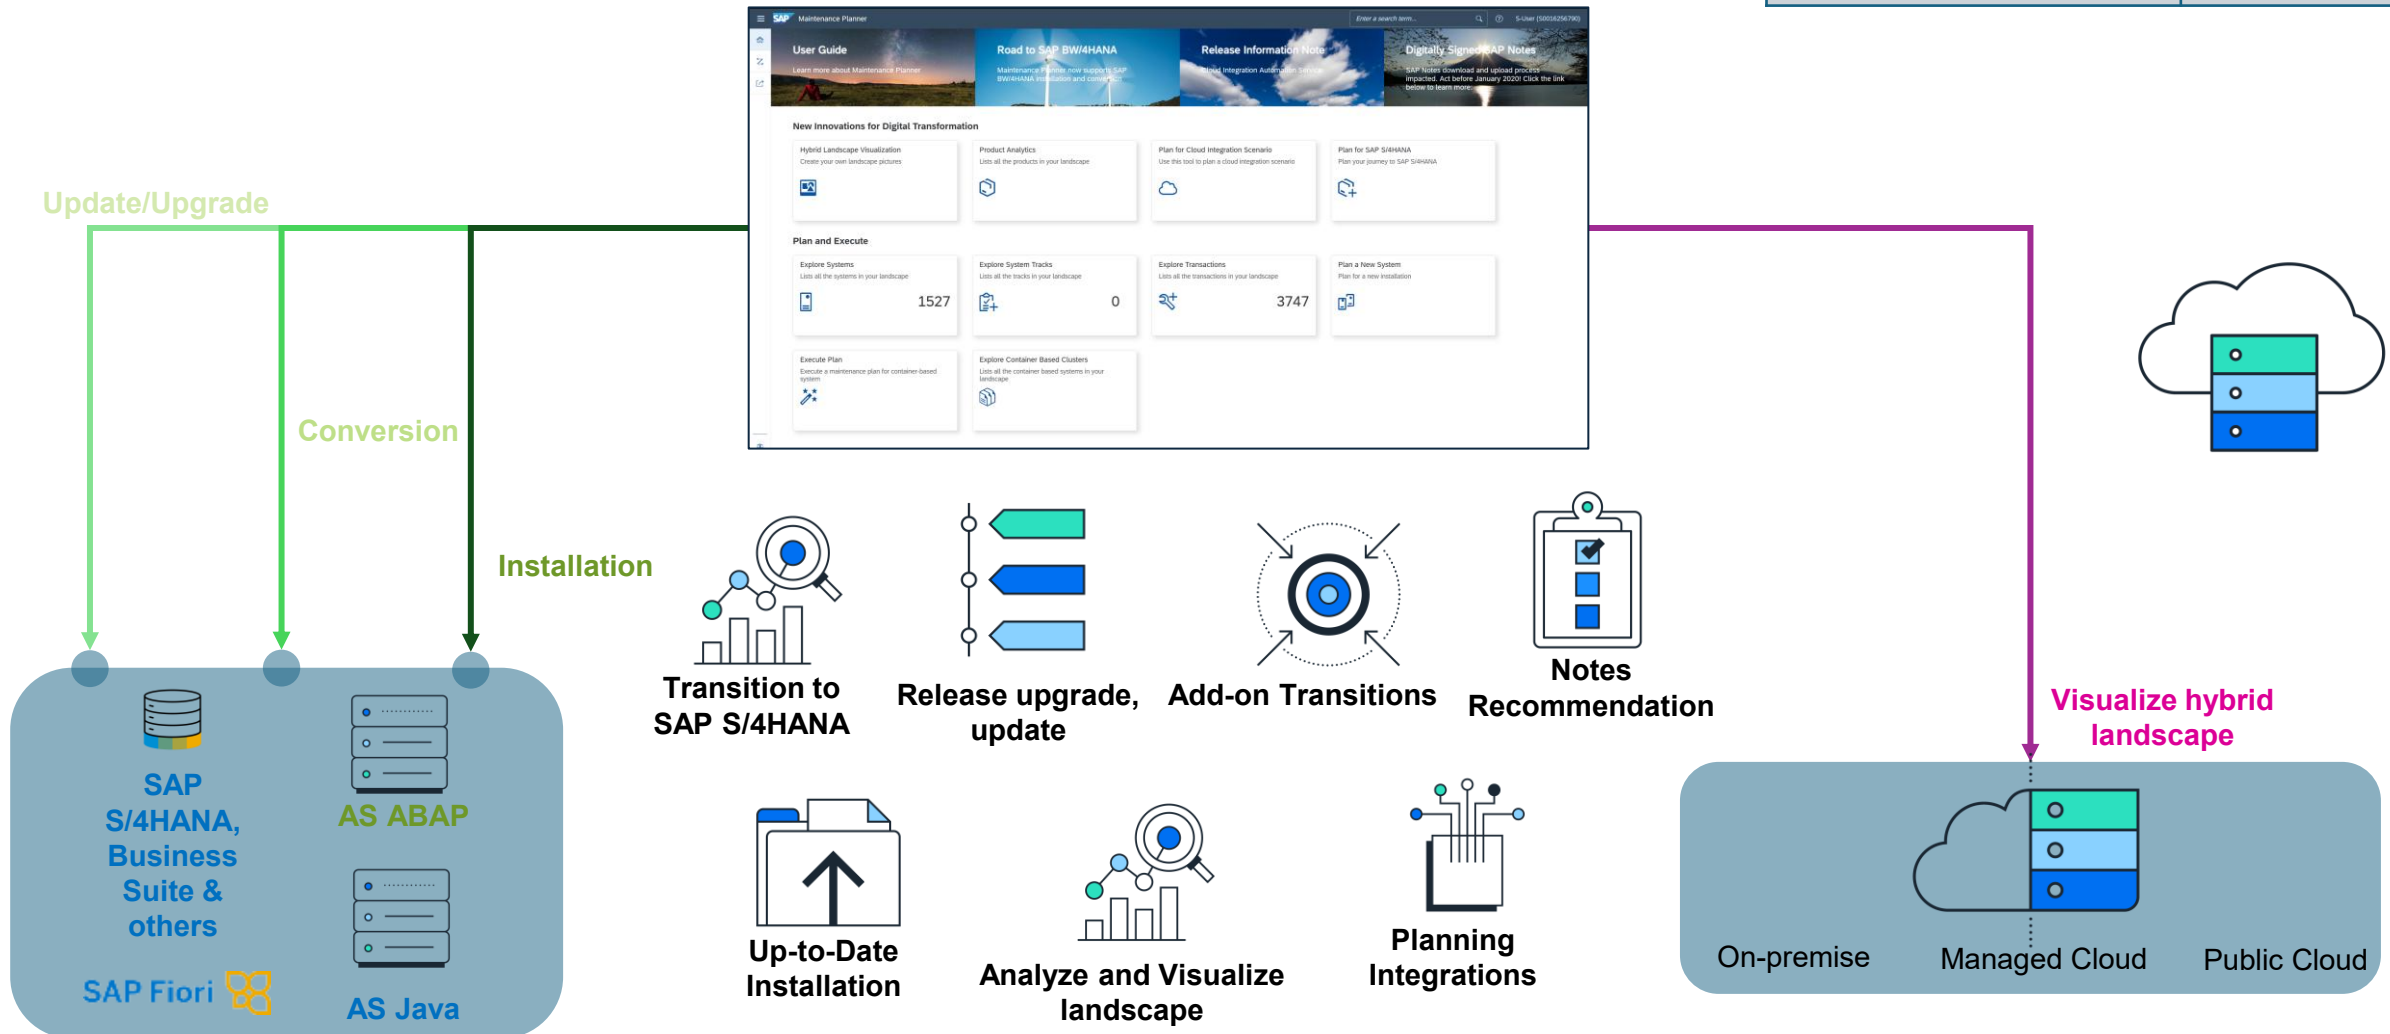

Maintenance Planner: Enabling Transitions to & Updates/Upgrades within RISE

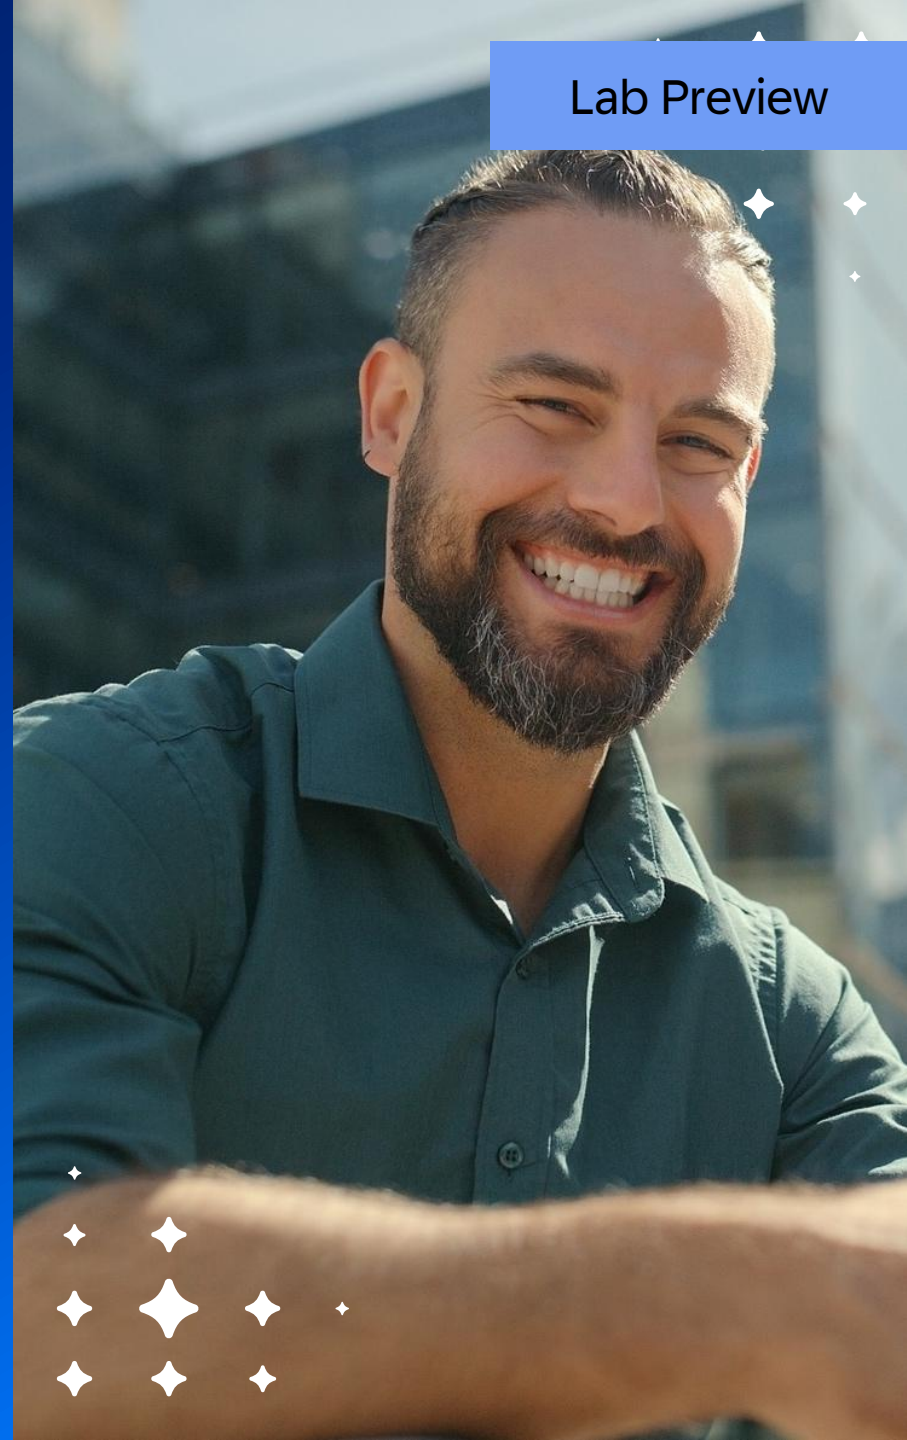

Maintenance Planner

End-to-end planning tool for software logistics

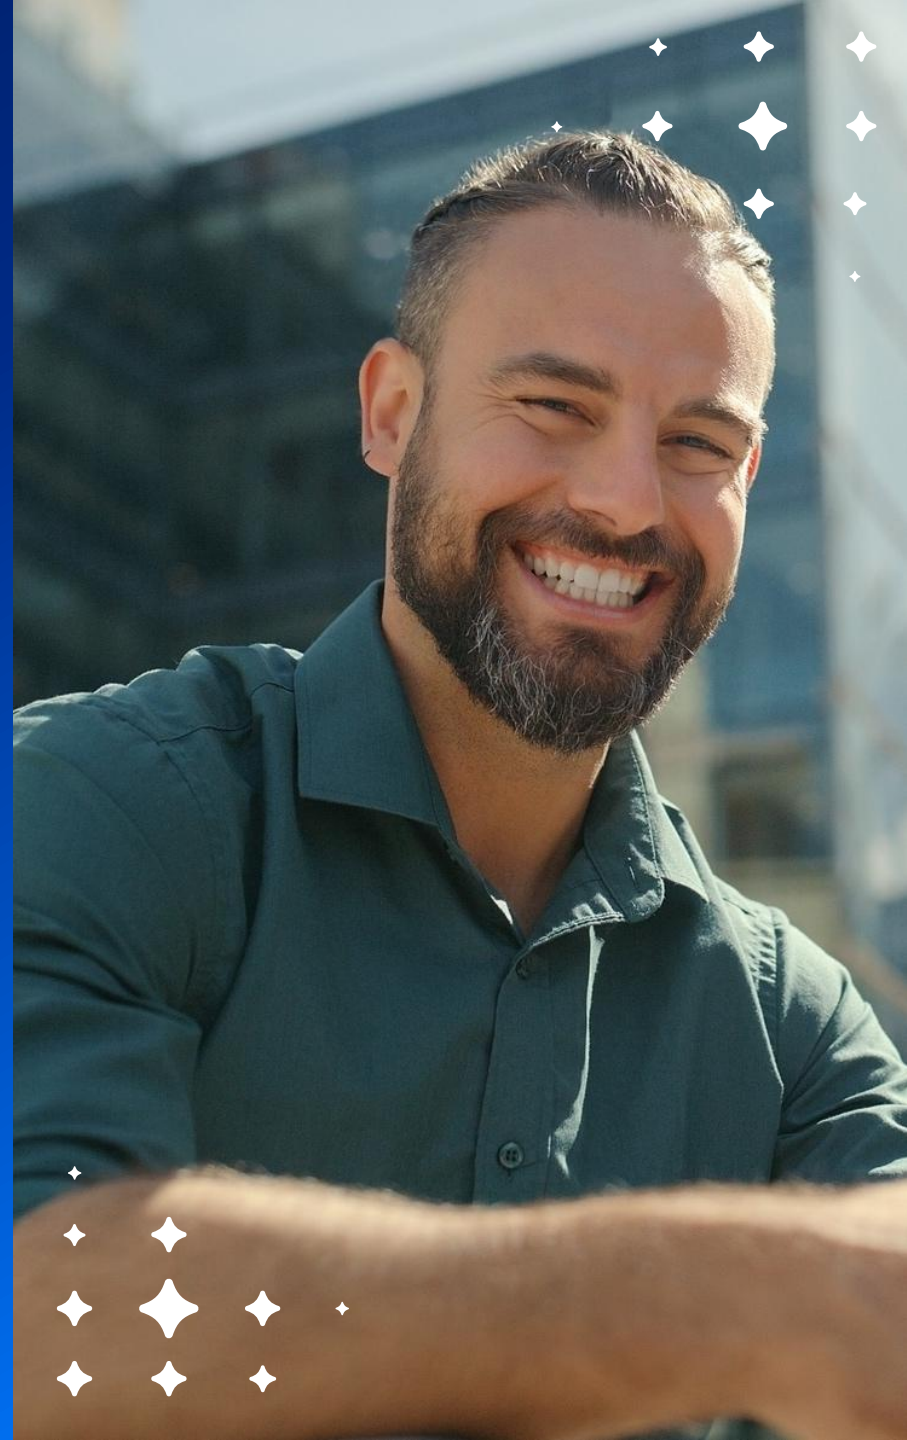

Maintenance Planner Usage Statistics	
Overall customers	30k+
Overall plans	~3+ million
Usage by external customers	30k+ plans / month
Usage by SAP ECS	3k+ plans / month
SAP S/4HANA usage	3k+ plans / month

Demo: Comprehensive Planning Assistance (COMPASS)

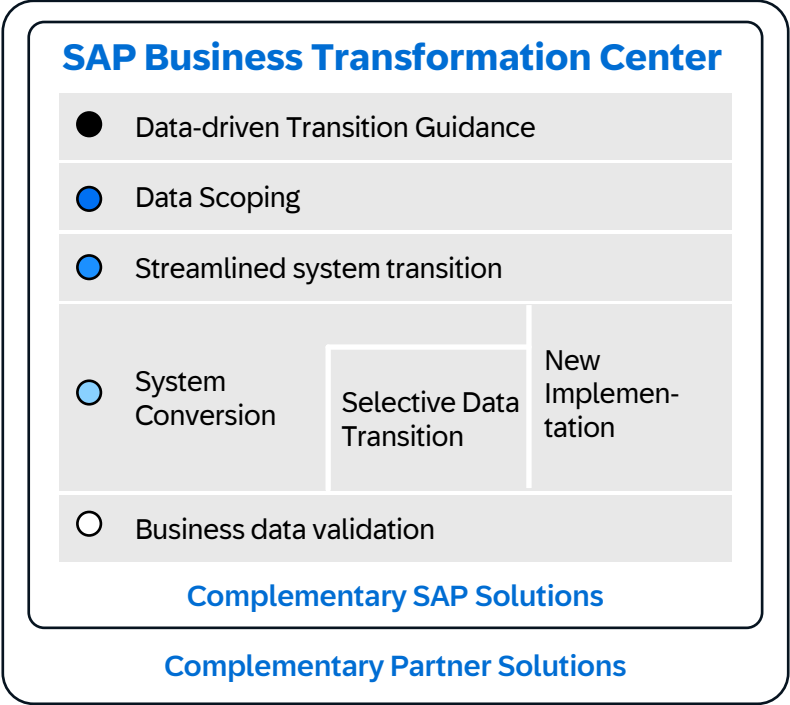

Accelerated Transition to Cloud

Accelerating our customers' cloud transition (recap CLM day 2025)

SAP Business Transformation Center – a 5-step guide for a successful transition

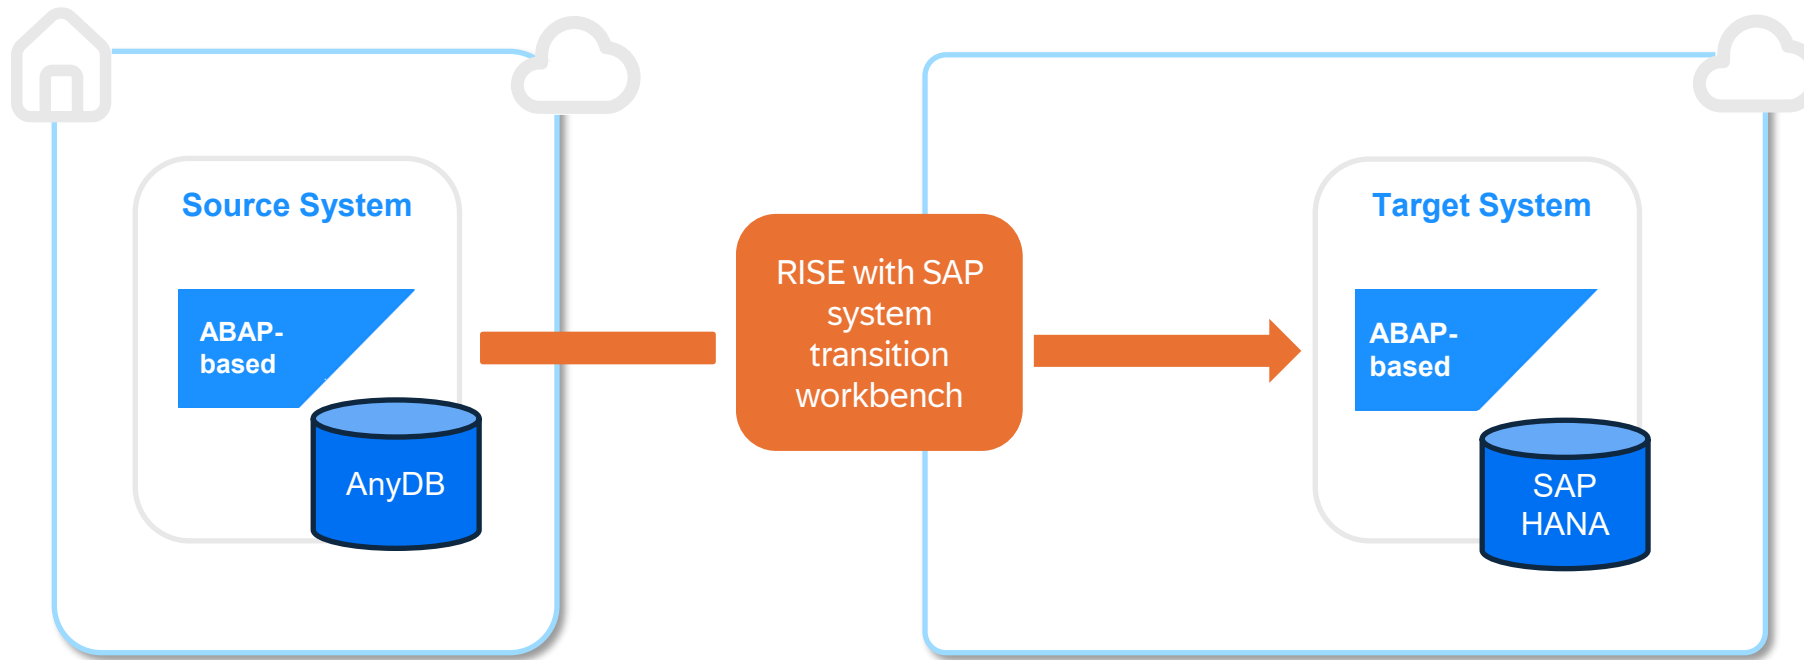

**RISE

RISE with SAP system Transition Workbench Start your RISE with SAP journey today

Regardless of your starting point the RISE with SAP system transition workbench* is your navigation system in the RISE with SAP journey. Available for all ABAP-based systems, like SAP ERP 6.0, SAP S/4HANA, SAP BW on HANA, SAP BW/4HANA, SAP CAR, SAP GTS, etc.

Safeguards your transition projects via a singular highly automated guided system transition procedure

Provides insights into potential challenges and best practices during the transition.

Allows you to concentrate on your business transformation, while building confidence in the success of the project

*release note: [3462243](#)

How to get started with RISE with SAP system transition workbench?

01

Check out the end-to-end demos available [here](#).

02

Read our official documentation [here](#).

03

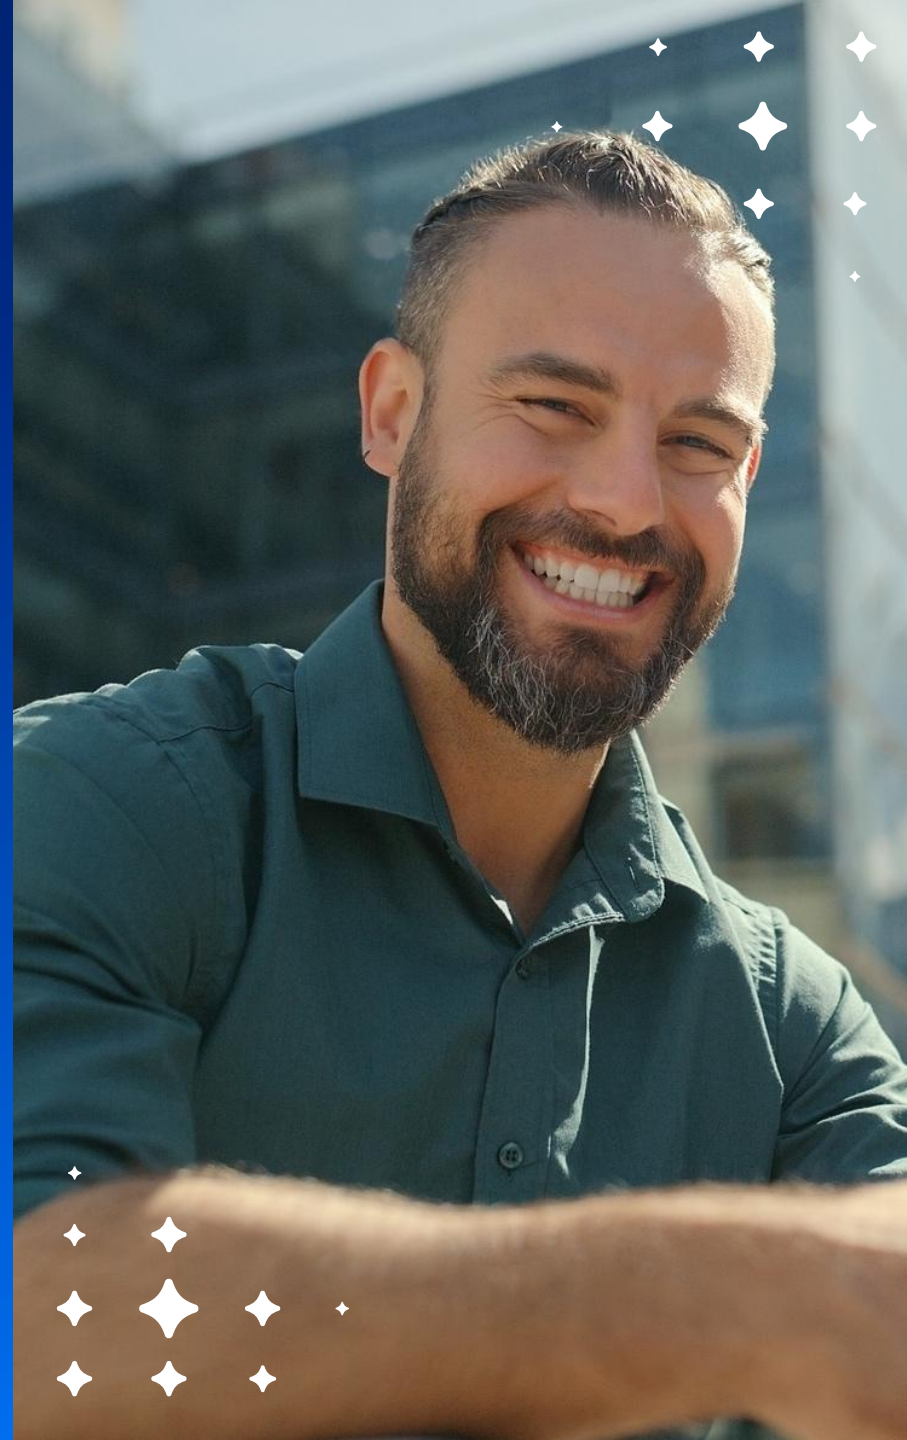

See the latest released version and troubleshooting in our release note <https://me.sap.com/notes/3462243>

04

Reach out to to request a 1:1 KT session or provide feedback for the tool.

Private Cloud Workspace

– Smart operations in RISE

Intelligent cloud operations for SAP Private Cloud customers

Unified operations across the SAP Private Cloud stack

Private Cloud Workspace

SAP's unified operational workspace for managing private cloud landscapes.

Complete Visibility

A single operational view for your SAP private cloud landscape

Continuous Evolution

Always up-to-date with SAP releases and updates

Intelligent Control

AI-assisted operations with guided insights and actions

Management Plane | Accessible via SAP for Me | Joule Work

One workspace end-to-end

From landscape transparency to lifecycle execution

► Landscape Visibility

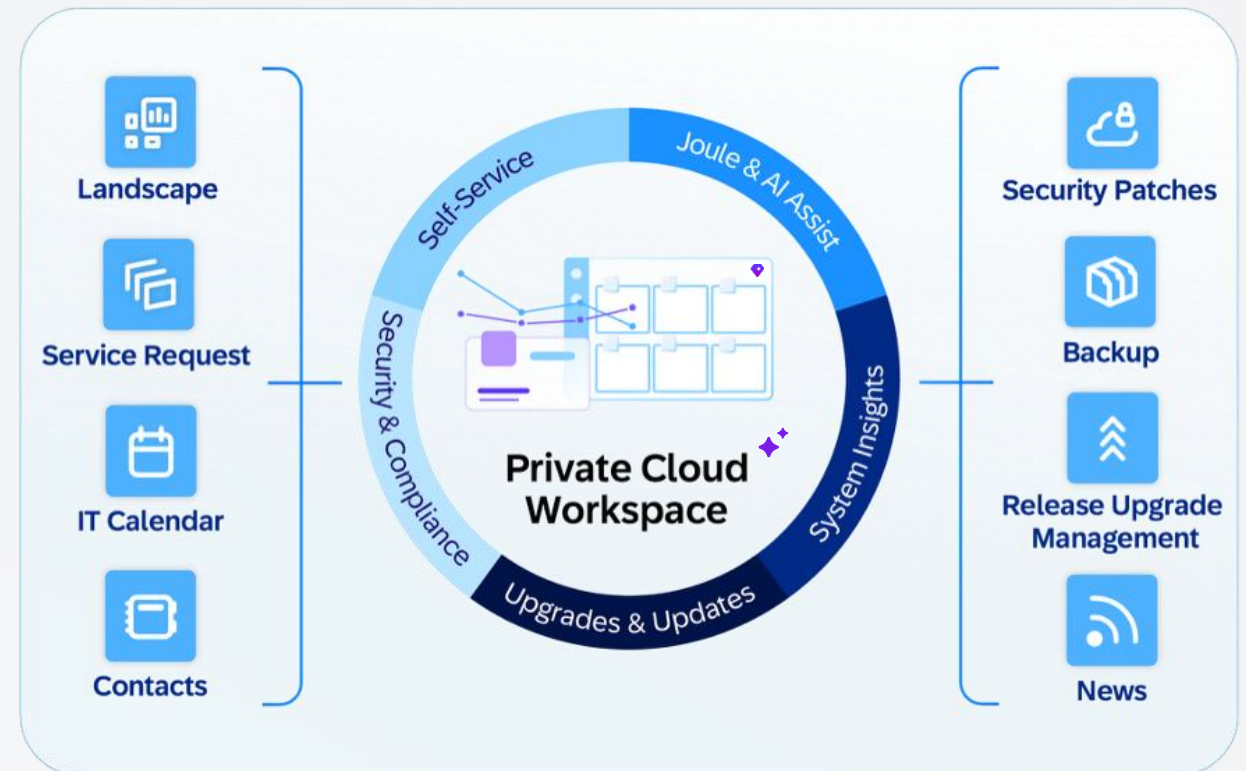

Gain a consolidated view of your landscape, detailed system insights and system visualization, operational events, CAS entitlements(if applicable), relevant news and key contacts.

► Service Engagement

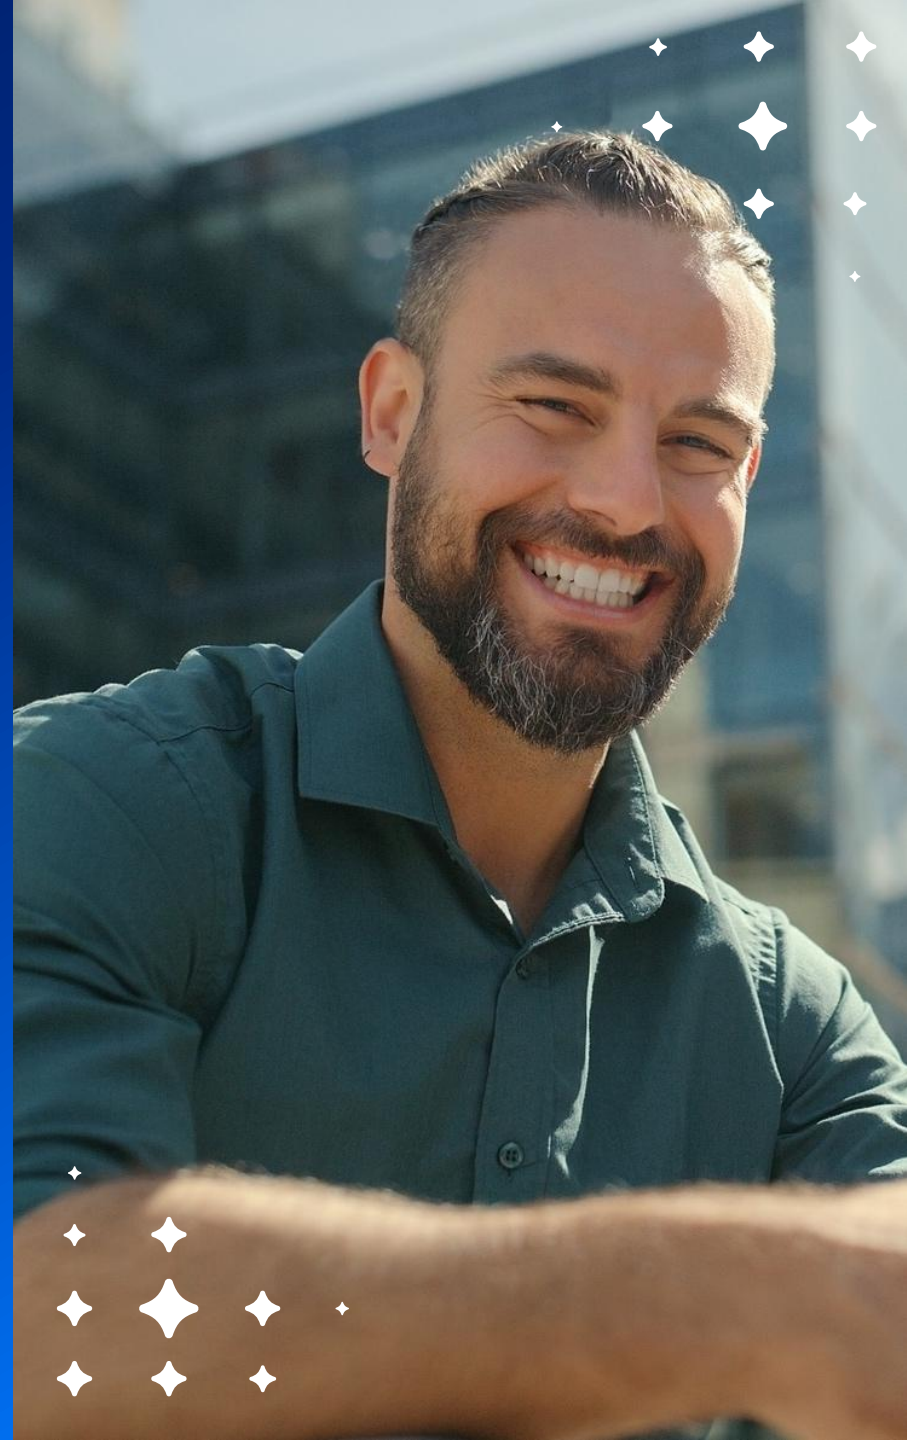

Raise and track service requests available via a service catalogue, use guided self-service for common operational needs, and receive Joule- and AI- assisted support to find information and act.

► Lifecycle Management

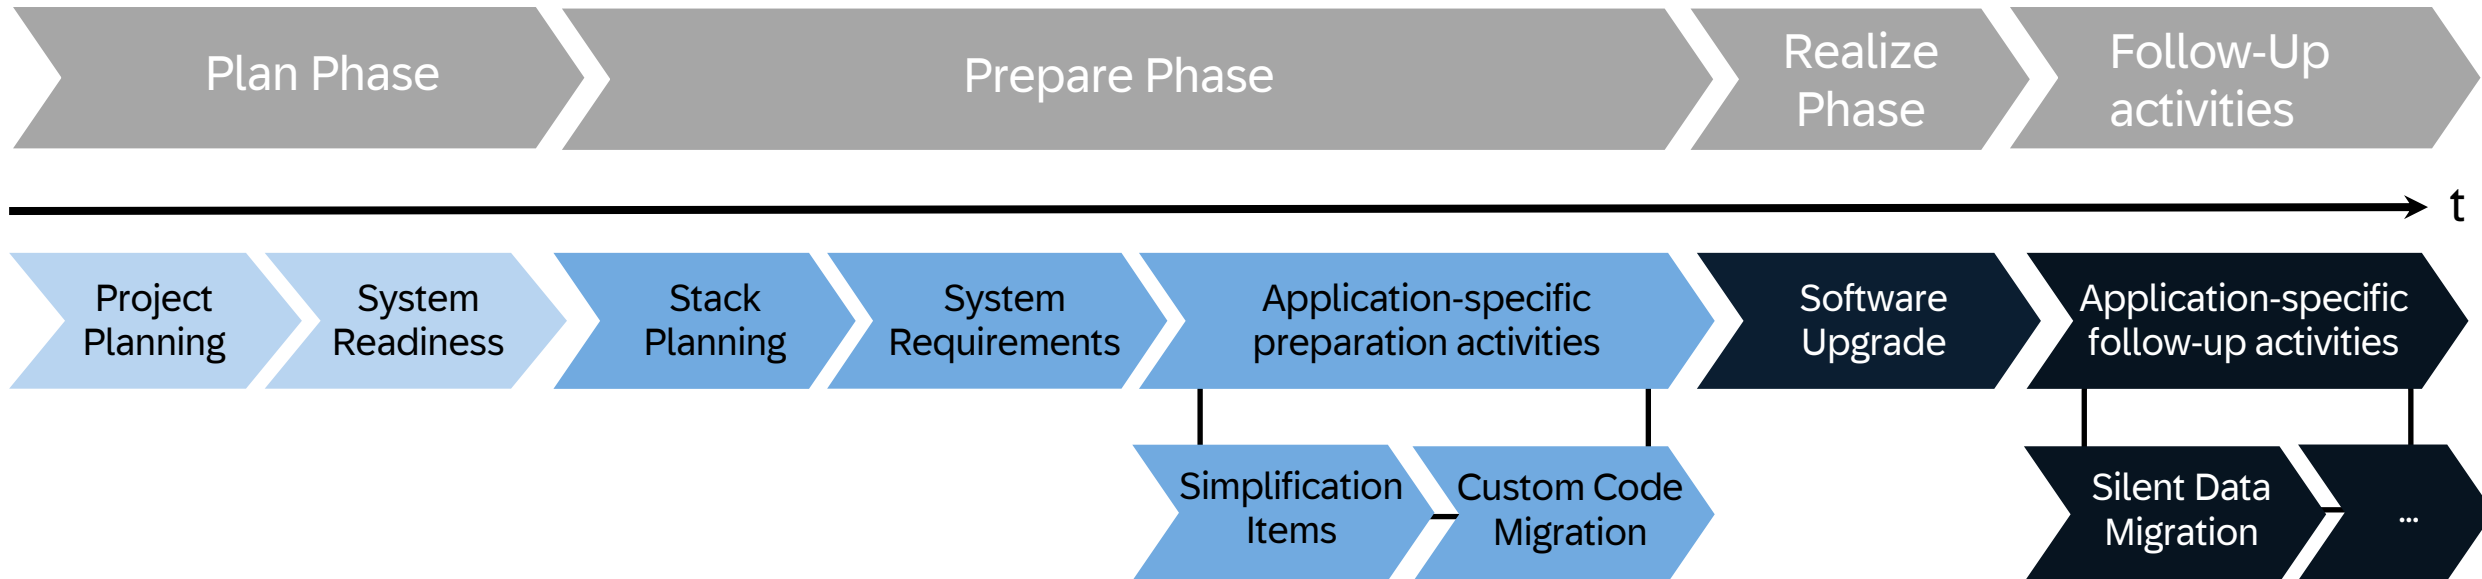

Support the planning and execution of ongoing lifecycle activities, including backups, resource consumption, release upgrade and updates, and security and compliance-related operations.

Accelerated End-to-End Upgrade Process in RISE

Overview of the Steps to Upgrade to SAP S/4HANA

Your pit stop crew

Engagement models for upgrades

Customer Managed Upgrade

Available for all SAP Cloud ERP Private Customers

Customer leads the project governance, planning, and coordination. SAP provides technical upgrade execution.

SAP: Technical Upgrade Team

Customer: Project Manager + Basis Consultant

SAP Managed Upgrade

Available for customers with Enhanced Operations Service

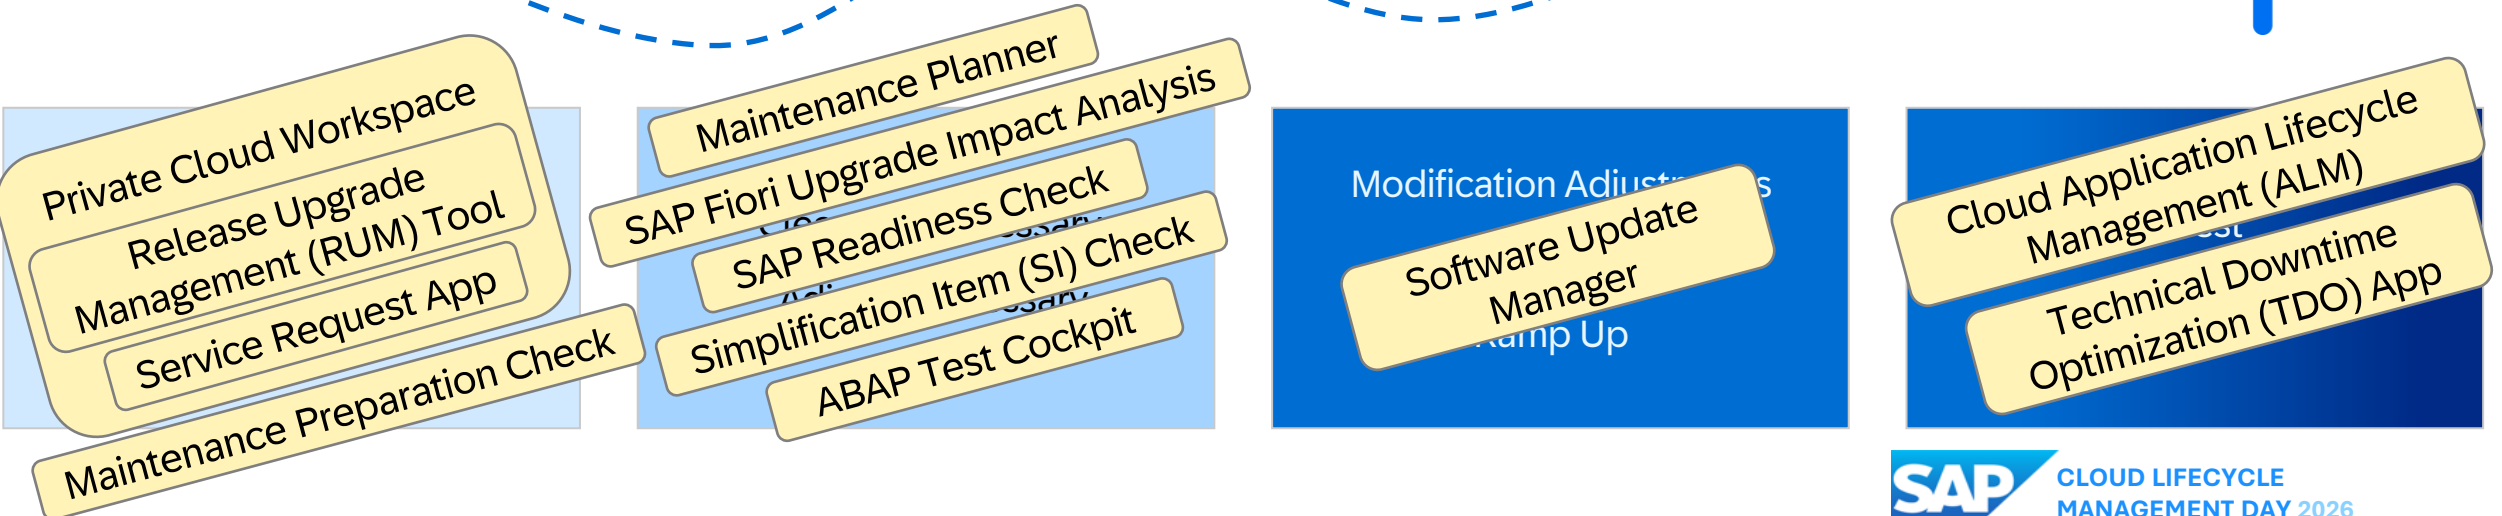

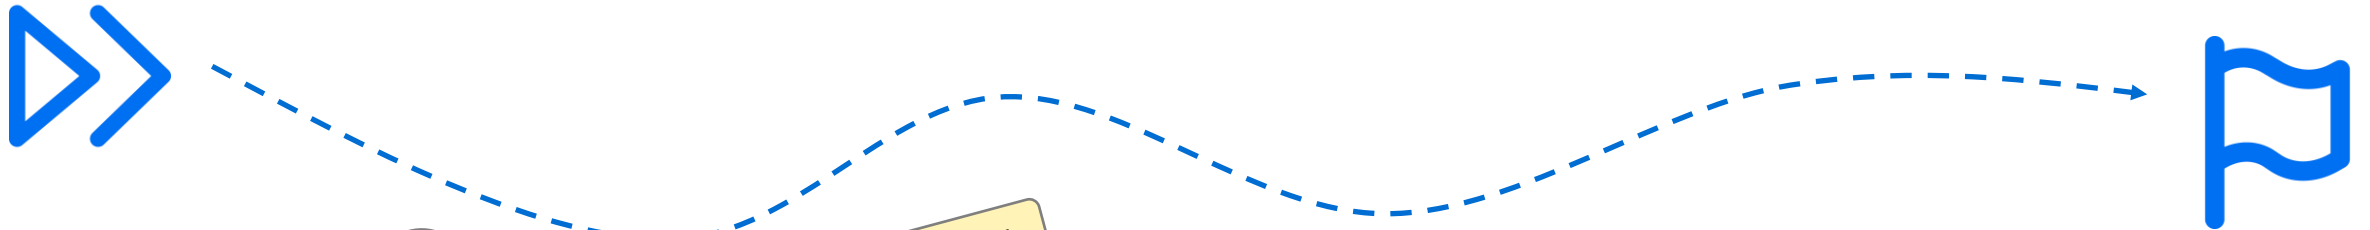

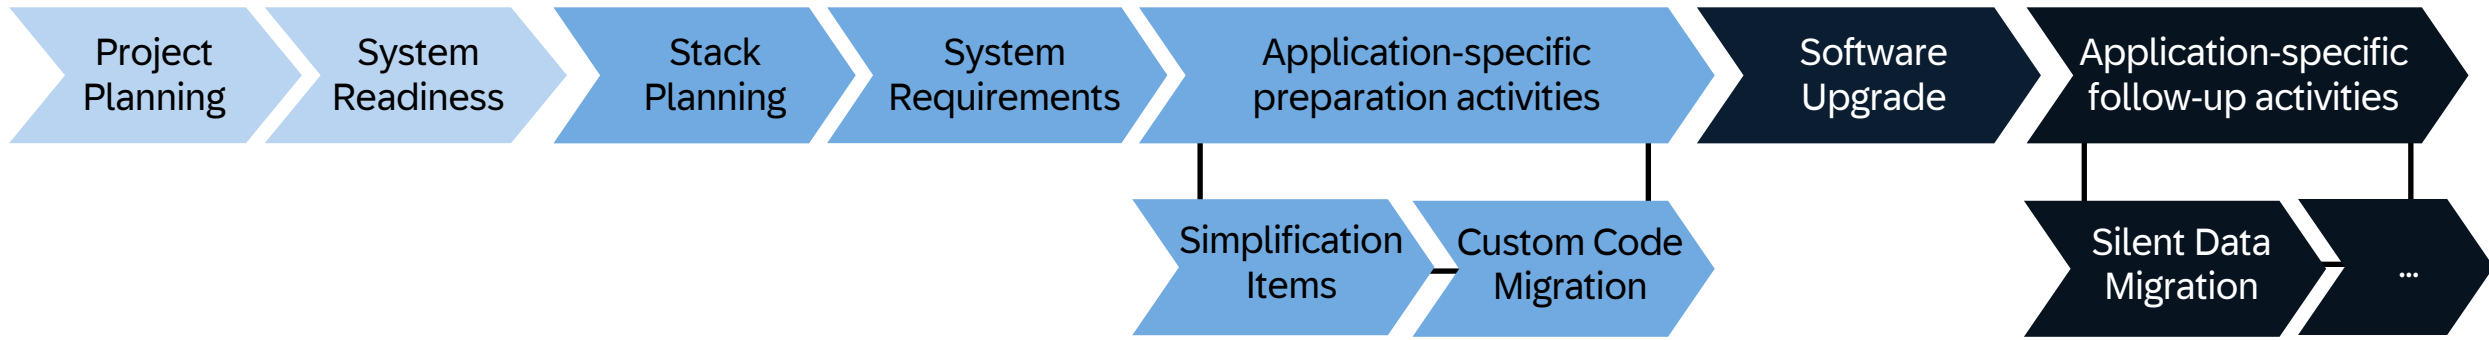

SAP leads the project with a dedicated Project Manager. Customer focuses on business validation and testing.

SAP: Technical Upgrade Team + Project Manager

Customer: Validation + Acceptance Testing

Your pit stop: Upgrade to SAP S/4HANA

The toolkit

Release Upgrade Management Application

Your entry point for Updates and Upgrades

Your streamlined upgrade experience

Key Benefits

An upgrade or update project with SAP Enterprise Cloud Service will be initiated by the customer in Release Upgrade Management application through SAP For Me.

Streamline every phase of your upgrade journey

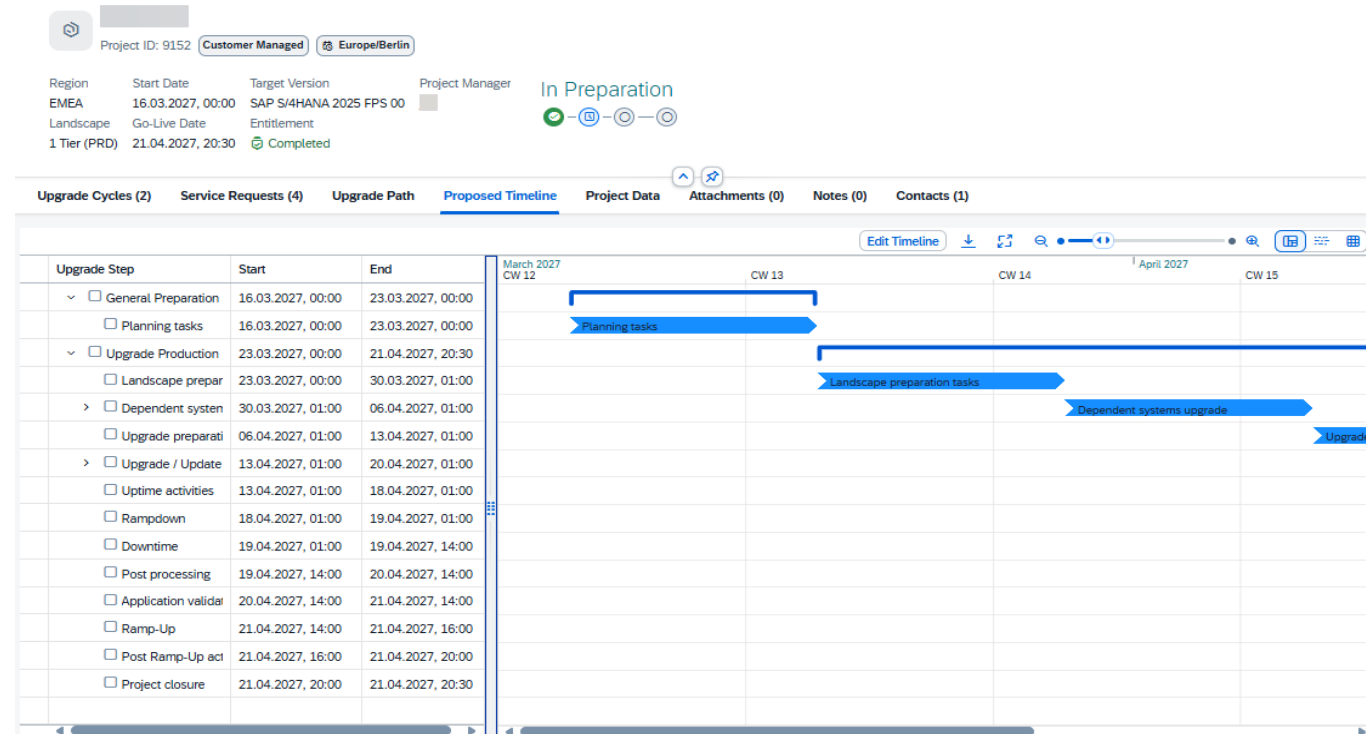

Identify technical dependencies and add-on compatibilities

Determine the estimated timeline and transition roadmap

Track all service requests created in the project

Monitor the technical execution and collect execution statistics

Track and maintain detail tasks during each upgrade cycle

Maintenance Preparation Check

Verify technical System Readiness with one Click

The readiness of your system always at your hand

Key Benefits

One click to understand the common stops during an upgrade – and to erase them for a seamless and fast upgrade experience.

Verify technical system readiness with one click

All findings at a glance

Dive into detailed results to clean up the blockers

Leverage built-in AI capabilities to automate closure **planned**

Minimize upgrade delays

Accessible via Release Upgrade Management in Private Cloud Workspace

Maintenance Preparation Check 07/05/2026

System ID: SO1 System Number: Hostname: Generated On: 07/05/2026

Status: **Not Ready For Upgrade**

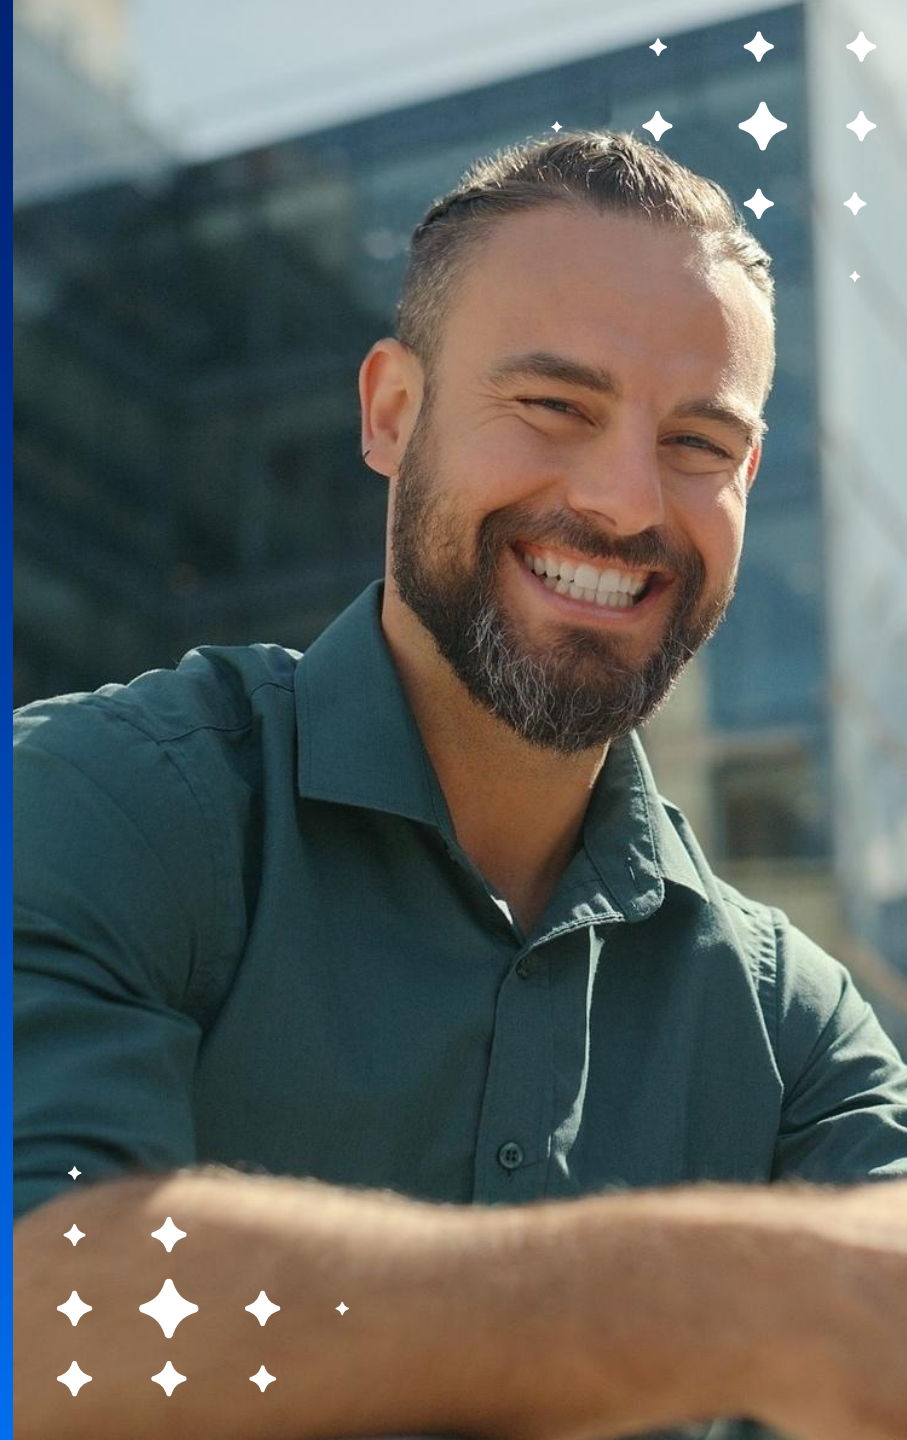

Explore Systems in RUM Re-run Checks

System and DB Information Upgrade Preparation Checks Additional Information

Upgrade Preparation Checks ❌ Not Ready For Upgrade

Technical Findings	Issues	Status
Open Workbench Requests	6	❌ Issues Identified
Unfinished Silent Data Migrations	0	✅ Success
Aborted DB Table Conversions	0	✅ Success
TADIR and Component Consistency Check	5	❌ Issues Identified
Inactive Objects	68	❌ Issues Identified
Old Aborted Update Tasks	0	✅ Success
Pending Data Extractor Queues	0	✅ Success
Pending RFC Calls	0	✅ Success
